# Workstation deployment information sheet

Record the actual site requirements with production, IT and equipment personnel. Use a separate sheet for each workstation configuration.

## 01 / Project and installation

| | |
|---|---|
| Project / site / workshop | |
| Line / workstation ID | |
| Application / operator task | |
| Responsible contact | |
| Device model / configuration | |
| OS / application version | |
| Screen / input requirements | |
| Mounting / available space | |
| Power / environment / accessories | |

Complete electrical and mechanical requirements from the selected device documentation and the approved site plan.

# Connectivity, content and handover

## 02 / Network and controlled information

| | |
|---|---|
| Network / administrator | |
| Application endpoints / interfaces | |
| Connected equipment / data owners | |
| Document IDs / language / revision | |
| Fields / units / validation rules | |
| Timestamps / retention owner | |

## 03 / Acceptance record

| | |
|---|---|
| Scenario / expected result | |
| Actual result / exception case | |
| Corrective action / reviewer / date | |
| Approval / support contact | |

Keep credentials out of this worksheet. Resolve open requirements in the internal project record before acceptance. This sheet records requirements and does not replace a device specification or an approved site procedure.
